

MARK T. BERTOLINI, AETNA CEO...

“Bloomberg’s “Civic 50” survey ranked Aetna fourth in 2012 among S&P 500 corporations for “improving the quality of life in communities...” By helping to improve quality of life for Americans and people across the globe, we have built on our foundational strengths a solid path to a more sustainable future.”

Aetna Sustainable Achievements

- Our telework program yearly saves 3.7 million gallons of gas and reduces carbon dioxide emissions by over 33,000 metric tons.

The Installation of Solar Panels at two facilities has given Aetna the capability of generating 518,000 kilowatt hours annually, enough energy to power 55 households.

Aetna Bullish On Energy Conservation

- Through energy-saving efforts across the company, Aetna has reduced its electrical consumption by 14,237,167 kwh since 2010, enough to power 1,504 homes for a full year.
- By optimizing advanced power, cooling and computer technologies, we reduced data center energy consumption 4.4 percent from 2010 to 2011 and 6.3 percent from 2011 to 2012.
- 25 Aetna owned and leased facilities across the country are Energy Star-labeled.

Aetna Taking The LEED®

- Early in 2012, Aetna earned Leadership in Environmental Design (LEED®) Silver Certification for the nearly two-year long renovation of the Atrium building on its Hartford, CT, campus.
- The Aetna Customer Center in Hartford achieved Leadership in Energy and Environmental Design (LEED®) Silver certification in 2009 for its management of energy, lighting, water and building materials, and other sustainable strategies.
- To date, Aetna does business out of 11 LEED-certified buildings across the country, including owned and leased properties.

Aetna's Corporate Office Retro-Commissioned

- Installation of plate and frame heat exchangers uses cold outdoor air to make chilled water.

- Enhanced BAS Strategies allow the use of Airside Economizer operation which provides free cooling during the winter months.
